PROJECTS

Ecommerce Website:

Developed a comprehensive ecommerce platform from scratch, incorporating user-friendly interfaces and secure payment gateways. Implemented features such as product browsing, cart management, and order tracking, ensuring a seamless shopping experience for customers. Utilized responsive design principles to optimize the site for various devices, resulting in increased user engagement and conversion rates.

Blog Website:

Created a dynamic blog website with a focus on content management and user interaction. Designed an intuitive interface for authors to publish, edit, and manage articles, along with features like commenting and social sharing to enhance reader engagement. Implemented SEO strategies to improve visibility and attract organic traffic, resulting in a growing community of readers and contributors.

Chat Web Application:

Engineered a real-time chat application using modern web technologies, enabling users to communicate instantaneously across different devices. Implemented features such as private messaging, group chats, and multimedia sharing, prioritizing security and scalability. Employed WebSocket technology for efficient data exchange and responsive UI design for a seamless user experience. Integrated authentication mechanisms to safeguard user privacy and maintain data integrity.
